April 24, 1987

"THE VOICE OF CONSERVATION"

Dear Cindy,

Dear Center for Birds of Prey Volunteer,

In recognition of your contribution to the wildlife of Florida and the Central Florida community, and in celebration of National Volunteer Week, please accept our sincere appreciation for your volunteer efforts.

This combined effort of staff and volunteers enables so many worthwhile things:

- * the successful treatment of 419 raptors in 1986 and already 168 in 1987
- * the increased awareness of many Center visitors as to the problems birds of prey are facing in today's environment
- * the remodeling and construction of several rehabilitation and aviary display cages..
- * many other varied tasks and improvements ranging from the computerization of the aviary bird records the Bald Eagle Stamp Program and other activities

Without your help doing the daily, sometimes menial, tasks necessary for the operation of the Center, those glorious moments of watching a rehabilitated hawk, owl, vulture, or eagle fly away for a second chance at freedom, would not be possible!

The Center staff alone could never meet the ever-growing needs of the education and rehabilitation facility we are becoming without YOU, our dedicated volunteers! THANKS for caring and sharing your time at Florida Audubon Society's Center For Birds of Prey!

Sincerely,

Bernard Yobel

Bernard Yobel, Ph.D.
President, Florida Audubon Society

Thanks for your help!

Reese Collins
Curator, Center for Birds of Prey
