May 12, 1990

Fourth and fifth graders at Western Hills were most fortunate to have Mrs. Cindy Westra and her rehabilitated animals as special guests on May 8.

The students and faculty were enlightened and saddened by the presentation about our endangered environment, but were motivated to do as much as possible to make our own homes and surroundings safe for life.

As the fourth grade science teacher, I am grateful for this program as a culmination and extension of our recent study of the ecosystems, and the need for balance for a healthy environment.

Mrs. Westra is an excellent speaker. Her presentation with the slides and live animals was fascinating.

Sincerely,  
Nita Pitts
